	Urgent	Not Urgent
Important	**Do - (Your MVP)** ● ● Create a website where users can log runs with dates, distances, and times. ● ● Save workouts in a database and display running history. ● ● Automatically calculate pace, total weekly mileage, and average pace.	**Schedule - (For V2.0+)** Add user accounts and authentication. Integrate with Strava or other fitness apps. Add advanced analytics, such as personal records and pace predictions.
Not Important	**Delegate - (Use a library)** Use Chart.js to handle graph rendering and chart interactions. Use Spring Data JPA to handle common database operations.	**Delete - (Cut it)** GPS route mapping and live location tracking. Social features, leaderboards, and messaging. AI-generated workout plans or coaching.

	Use Thymeleaf to generate dynamic HTML pages from Java data.
